I haven't heard much about planning or this meeting, but I was expecting something like this. I'll talk to Dick (who may or may not be at the 4/22 mtg) & start thinking about a short Source Control update.

Thanks
Jim

Jim

Can't recall if we talked about this much at the last TCT. I haven't seen the "invites" for this meeting yet, but the planning is well underway. Dan has been talking with Hillary Barbour about adding some more structure to the meeting, and along those lines we're planning to do a joint EPA/LWG presentation (informal, not ppt) on the FS schedule, the latest extensions, key schedule issues, etc, and the Post-FS expected schedule (Proposed Plan, public comment, ROD). There is also an interest in having a short status/update discussion upland source control. I believe Dan has discussed with Dick & assume you're aware, but wanted to make sure you were aware the expectation is out there.

Chip.
